

A heatmap visualization showing the log Wall Clock Time (Y-axis) as a function of the Number of Items (X-axis) and the Number of People (Z-axis). The X-axis ranges from 1 to 10, and the Z-axis ranges from 1 to 10. The color scale ranges from -5 (dark purple) to -1 (yellow). The plot shows that the log Wall Clock Time is generally higher (less negative) for higher numbers of items and people, with a significant peak (yellow) at 10 items and 10 people.
